Professional Summary

Driven Software Engineer and final-year B.Tech student in AI and Data Science with practical experience creating high-performance AI and machine learning solutions. Skilled in Python, Generative AI, LLMs, and RAG architectures. Experienced in API integration, automation, and building scalable systems.

Technical Skills

Languages: Python, SQL.

AI & Machine Learning: Generative AI, LLMs, RAG, NLP, Deep Learning

Libraries & Frameworks: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, Hugging Face, LangChain

Cloud & DevOps: IBM Watson, FastAPI, Flask, Git, GitHub

Tools: VS Code, Jupyter Notebook, Power BI, Google Analytics, n8n

Professional Experience

Microsoft Copilot AI Intern — Empathy Technologies — Remote

Feb 2026 – Present

- Developing AI-driven automation solutions using **Microsoft Copilot Studio** and **Microsoft Power Automate**.
- Integrating AI copilots with **Microsoft 365** services and **SharePoint**.
- Designing automation pipelines to improve operational efficiency.

Key Projects

RAID Tracking Automation using AI Agents — Python, LLM, Graph API, Microsoft Azure

- Situation: RAID data across emails, Teams chats, and meetings was inconsistently tracked, causing poor visibility.
- Task: Build an automated system to extract and manage RAID items.
- Action: Developed AI agents using **Microsoft Graph API** for ingestion and implemented an **LLM-based classification pipeline**. Integrated storage with **SharePoint**.
- Result: Automated RAID tracking and improved efficiency by **70%**, enabling centralized monitoring.

Financial Services Customer Churn Analysis — Python, Excel, Power BI

- Situation: Difficulty in identifying customers likely to churn.
- Task: Develop a predictive model.
- Action: Performed data cleaning and feature engineering.
- Result: Achieved **82% accuracy** and built dashboards for insights.

Leave Management Agent — Microsoft Copilot Studio, Power Automate, SharePoint

- Situation: Manual leave management caused delays and inefficiencies.
- Task: Automate leave workflows.
- Action: Built a conversational agent using **Copilot Studio** with **Power Automate** and **SharePoint**.
- Result: Enabled **100% digital tracking**, reducing administrative effort.

Education

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

Nehru Institute of Engineering and Technology — Coimbatore, India 2022 – 2026

Achievements & Certifications

- Winner: Splunk Hackathon (Awarded 17,000 INR prize)
- Winner: Naukri Campus Young Turks 2025
- Certifications: **Microsoft Azure AI Fundamentals**, **AWS ML Foundations**, **IBM AI with Python**
