

DEEPA ANANTHAN AR

+91-8610378936 — deepaananthanar@gmail.com — Chennai

LinkedIn — GitHub — Portfolio

Professional Summary

B.Tech graduate in Artificial Intelligence and Data Science with internship experience developing enterprise AI applications, intelligent automation solutions, and machine learning models using Python, TensorFlow, Scikit-learn, FastAPI, and Azure. Skilled in NLP, Computer Vision, Generative AI, LLMs, REST APIs, and AI Agents with hands-on experience building scalable AI solutions through academic and industry projects.

Technical Skills

Programming: Python, SQL, C++, Object-Oriented Programming, Data Structures & Algorithms

Machine Learning: Scikit-learn, Supervised Learning, Classification, Regression, Feature Engineering, Model Evaluation

Deep Learning & Computer Vision: TensorFlow, PyTorch, Neural Networks, OpenCV, OCR, Image Processing

Artificial Intelligence: NLP, Generative AI, LLMs, RAG, AI Agents, Prompt Engineering

Frameworks & Libraries: FastAPI, Flask, REST APIs, Pandas, NumPy, Streamlit

Cloud & Tools: Azure, GitHub, VS Code, Microsoft Graph API, SharePoint, Postman, Power BI

Professional Experience

Microsoft Copilot & Automation Intern — Empathy Technologies

Feb 2026 – May 2026

- Developed AI-powered applications and intelligent automation solutions using Python, Microsoft Copilot Studio, Azure, and REST APIs.
- Built NLP pipelines and AI Agents using LLMs, Microsoft Graph API, and SharePoint for automated enterprise information extraction.
- Collaborated with engineering teams following Agile SDLC to develop, test, debug, document, and deploy scalable AI solutions.

Projects

RAID Tracking Automation using AI Agents— Python, Azure, Microsoft Graph API

- Developed AI-powered agents using Llama 3 and GPT-5-mini for automated extraction and classification of enterprise RAID information.
- Built NLP pipelines integrating Microsoft Graph API, Azure AD and SharePoint to automate enterprise workflows.
- Improved operational efficiency by approximately 70% through intelligent automation and centralized AI-powered tracking.

Financial Document Analysis Chatbot— Python, OCR, NLP, LLM, Streamlit

[Repo Link](#)

- Developed an AI-powered chatbot using OCR, NLP, and LLMs for financial invoice analysis and document understanding.
- Built document processing and analytics pipelines using OCR, NLP, and LLMs, exposing backend functionality through Python APIs.
- Improved financial document analysis efficiency by approximately 80% through conversational AI, reducing manual effort.

AI-Powered Email & Ticket Categorizer — Python, Flask, Scikit-learn, NLP, NVIDIA NIM, Llama 3.3

[Repo Link](#)

- Developed a hybrid AI system using TF-IDF, Naive Bayes, and Llama 3.3 for email and ticket classification.
- Built a confidence-based LLM fallback pipeline with priority prediction and explainable AI responses.
- Improved operational efficiency by approximately 85% through intelligent automation and NLP-based ticket categorization.

Education

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.7/10

Nehru Institute of Engineering and Technology, Coimbatore

2022–2026

Certifications

- Microsoft Azure AI Fundamentals
- AWS Machine Learning Foundations
- Career Essentials in Generative AI by Microsoft and LinkedIn
